

KANSAS WILDCAT™

The Kansas Wildcat™ provides customers with a uniquely designed BOP for today's more challenging surface trees. The **“NEW” BOP** offers a 45-degree flow outlet for easier adaption to flowline height. The solid forged alloy steel body eliminates the risk for casting porosity in higher pressures.

Specifications:

- ✓ 100% pressure tested from factory
- ✓ 5000 psi Max. working pressure
- ✓ Blowout proof ram bolt
- ✓ Molded pressure balanced rams
- ✓ Forged alloy steel body
- ✓ Meets NACE MR0175
- ✓ HSN ram seal
- ✓ Two 2 in. LP flow outlets at 45° angle
- ✓ Two 1” NPT outlets above and below rams for pressure gauges

Maintenance:

- ✓ It is recommended to operate rams at least once a month
- ✓ When rig is on well, check ram integrity, if needed, replace rams
- ✓ **IMPORTANT** – Make sure rams are in OPEN position before restarting well operations

Kansas Wildcat™

“Customer Corner”

- The Kansas Wildcat can reduce over all stack height, increasing stroke length
- Easy adjustment of your flowline height reducing cost
- Compact design
- Decrease leak paths, threaded connections and fugitive emissions
