

The Global Wellhead Systems Authority™

| Model HW Specifications |                                                 |
|-------------------------|-------------------------------------------------|
| Max. slip load          | 83,000 lbs.                                     |
| Working pressure        | 2000 PSI                                        |
| Minimum bore            | 4.090" (4-1/2") – 5.012" (5-1/2") – 6.551" (7") |
| Cap Thread              | 8-1/4" 6-UN                                     |
|                         |                                                 |
