

Remote Rod Rotator Greaser & Polished Rod Lubricator **Pumpers Friends™**

**SAFETY
ALERT**

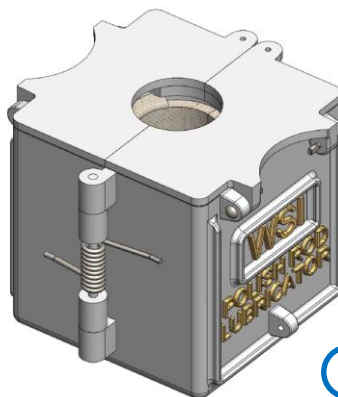

The NEW Remote Rod Rotator Greaser is designed for safety and efficiency. The pumper can now remotely grease the rod rotator without the need of a harness, lift truck or shutting down production. The Remote Greaser provides easy access to the grease manifold at ground level. The manifold is positioned on the Samson post of pumping unit and routed to the grease zerks on the rod rotator. This unique design reduces safety risks and increases productivity. WSI's Polished Rod Lubricator decreases effort and increases productivity in lubricating stuffing box packing rubbers.

- ***Eliminates the need for service bucket truck and safety harness***
- ***Not necessary to shut unit down to grease increasing productivity***
- ***Decreased maintenance time and cost***
- ***Easy installation***
- ***Available with all models***

- ***BEST PRACTICE to increase stuffing box packing life***
- ***Automatic oiler with every stroke of the pumping unit***
- ***Not necessary to shut unit down to grease increasing productivity***
- ***Decreased maintenance time and cost***
- ***Easy installation***

WSI
