

Pumper Toolbox Necessities

The Pumper Toolbox Necessities brochure illustrates safety and support tools for assisting pumpers in routine maintenance settings, as well as service-related activities requiring well control.

Third Hand

- ✓ Maintenance tool to help pumper when replacing stuffing box packing.
- ✓ Third hand safely suspends stuffing box cap, allowing access to packing chamber

Pigtail Puller

- ✓ Maintenance tool to help expedite the replacement of Superdome and cone style packing
- ✓ Pigtail connection penetrates cone rubber compound for effective packing removal from the stuffing box
- ✓ Pigtail can quickly be unscrewed to reveal threaded tool used to remove Superdome packing
- ✓ Threaded tool screws perfectly into brass split rings for replacement

Bullet

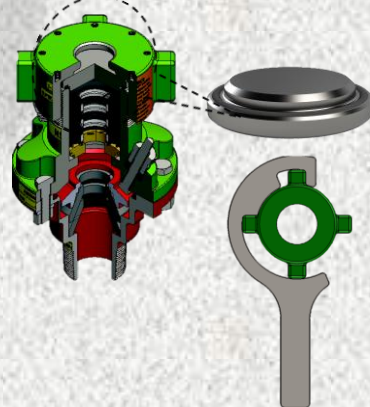

- ✓ Maintenance tool to help assist in the replacement of the polished rod through the stuffing box
- ✓ Reduces chance of prematurely damaging new packing
- ✓ Bullet should be used when running stuffing box flapper assembly to protect flapper when installing polished rod

Night Cap/Spud

- ✓ Provides a seal to atmosphere.
- ✓ Night cap must be used with modified BS cap (BS cap included)
- ✓ 2" NPT option for pressure gauge w/ modified cap

Rod Suspension Tool

- ✓ Suspend rods for offsetting frac pressure
- ✓ Store rods within the tubing
- ✓ Decrease maintenance capex spend by not removing all rods from well
- ✓ Quick and easy process placing unit back into production with minimal cost and time
- ✓ Low-cost solution

BS Spanner Wrench
